

MEDICATIONS TO WITHHOLD PRIOR TO SURGERY

PLEASE STOP TAKING ANY OF THESE MEDICATIONS LISTED BELOW 7 DAYS PRIOR TO YOUR SURGERY.

If you are taking any blood thinning medication, please follow your instructions given by your doctor. All of these medications thin out your blood and could cause you to lose more blood than expected during surgery. If you have any questions, please call our office. If you are having a fusion procedure, please refer to your post operative instructions when you can resume your medication after surgery.
